

Community & Climate Programme Notes

Current public status

Status

The GAB Community & Climate Programme is the public pathway for community access, climate adaptation, social inclusion, responsible sourcing, training, and natural resource stewardship work.

A separate community and climate vehicle is planned, but the legal name is not yet finalized. GAB does not claim NGO registration, donor funding, or grants secured unless those facts are confirmed.

Focus areas

Community access, climate adaptation, social inclusion, responsible sourcing, natural resource stewardship, training, donor and grant partnership readiness, and community-sensitive environmental work.

Partner fit

Public agencies, donors, foundations, private partners, technical organisations, and community-facing initiatives that need practical implementation, clear records, and responsible local engagement.

Contact route

Use the website contact form and select Community/Climate Partnership.
