

Fresh Cassava Buyer Brief

GAB Climate Smart Investments Ltd

Who this is for

Industrial processors, feed mills, starch and ethanol operators, food processors, aggregators, and bulk buyers who need fresh cassava roots from a Ghanaian commercial farming operator.

Current supply focus

GAB supplies fresh cassava roots from the Mampong/Aframso operating area in Ashanti Region. Supply conversations are planned around harvest timing, buyer volume, delivery location, logistics, and quality requirements.

Cassava is the main commercial supply focus. Maize, pepper, and controlled-production vegetable pilots are handled where timing, demand, and buyer commitment make the opportunity practical.

What buyers should send

Product required, estimated volume, delivery location, timing window, preferred contact person, processing requirement, and any quality or moisture expectations.

GAB confirms fit before committing to supply. Price, loading, transport, and delivery terms are agreed directly for each buyer conversation.

Contact route

Use the website contact form and select Produce Supply, or call/WhatsApp +233 59 105 1711.
